PROFESSIONAL PROFILE

Full Stack Developer with experience in client-server web application development, end-to-end feature implementation (frontend and backend), REST API integration, and database management. Proficiency in React, TypeScript, Node.js, Express, PostgreSQL, and agile methodologies (Scrum, Kanban). Experience in testing with Cypress and using AI tools to optimize development processes.

PROFESSIONAL EXPERIENCE

Full Stack Developer

[ForIT Software Factory](#) | 2026 – Present

Development and maintenance of client-server web applications. End-to-end feature implementation integrating frontend with React and backend with Node.js/Express.

Consumption and integration of REST APIs for internal and external services.

Database management with Prisma ORM and PostgreSQL.

Automated testing with Cypress to ensure code quality.

Collaborative work under Scrum and Kanban agile methodologies.

Frontend Web Developer

[Evirtual S.A.](#) | 2024 – 2025

Design and development of web interfaces with React, TypeScript, and Tailwind CSS. Performance optimization and cross-browser compatibility. Technical support and application debugging.

Implementation of reusable UI components with React.

Responsive adaptation of web platforms with HTML5 and CSS3.

Load time optimization and frontend performance improvement.

Developer and IT Technician Freelance

Self-Employed | 2023 – Present

Development of custom web solutions for clients. Configuration of development environments with Docker and Git. Technical problem resolution and IT support.

Web application development with JavaScript and Node.js.

SQL Server and MongoDB database configuration.

Version control with Git and GitHub.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, REST APIs, .NET, C#, Java

Databases: PostgreSQL, Prisma ORM, MongoDB, SQL Server

DevOps: Docker, Git, GitHub | Testing: Cypress | Methodologies: Scrum, Kanban

AI for development: Claude, ChatGPT, Gemini, GitHub Copilot | OS: Windows, Linux | IDE: VS Code, Cursor, Antigravity
